Soffit Disc Vent

Product Description

Corovent Soffit disc vents provide ventilation at the eaves of a roof. The soffit disc vent is designed to be used with standard horizontal soffit boards on new or existing roofs. They are push fitted into 70mm diameter holes, the soffit board should be 4mm or thicker to ensure a satisfactory fit.

- One unit provides 2000mm² ventilation
- Provides continuous 10mm ventilation when one unit is fitted every 200mm along eaves
- 4mm grid to keep out large insects
- Designed for use with soffit boards 4mm or thick or more
- Colours available: White/Black/Brown

Product Requirements	SD20-
Statutory Requirements	To provide ventilation at the eaves of a roof in accordance with Building Regs Document C2 & BS5250:2011 and The Building Standards (Scotland) Regulations. To achieve clear 10mm ventilation along the eaves (10,000mm ² per metre) when one unit is fitted every 200mm along the soffit.
Functional Requirements	To fit properly with a prepared soffit board on new or existing roofs. To be easily installed. Provide 10mm continuous ventilation at the soffit when one unit is fitted every 200mm along the soffit. To be prevent large insects from entering the roof void.
